Less math.
More music.

Print it, tape it next to your screen, and stop reaching for a calculator mid-session.

Delay and reverb times (milliseconds)

Set delays to these and they lock to the groove. For reverb, try a decay near the ¼ or ½ note and a pre-delay near the 1/64.

BPM	½ NOTE	¼ NOTE	DOTTED ⅛	⅛ NOTE	⅛ TRIPLET	1/16	1/64 (PRE-DELAY)
70	1714	857	643	429	286	214	54
75	1600	800	600	400	267	200	50
80	1500	750	562	375	250	188	47
85	1412	706	529	353	235	176	44
90	1333	667	500	333	222	167	42
94	1277	638	479	319	213	160	40
100	1200	600	450	300	200	150	38
105	1143	571	429	286	190	143	36
110	1091	545	409	273	182	136	34
120	1000	500	375	250	167	125	31
128	938	469	352	234	156	117	29
130	923	462	346	231	154	115	29
140	857	429	321	214	143	107	27
145	828	414	310	207	138	103	26
150	800	400	300	200	133	100	25
160	750	375	281	188	125	94	23
170	706	353	265	176	118	88	22

Any other tempo: ¼ note = 60,000 ÷ BPM. Halve it for ⅛, multiply by 0.75 for dotted ⅛, divide by 3 for ⅛ triplets.

Half-time and double-time

Feels too fast? Try half: 140 becomes 70. Too slow? Try double: 75 becomes 150. Trap at 140 and a ballad at 70 share the same grid, so a beat can work for both.

Every minor key at a glance

Each minor key shares its notes with a major key (its relative major), so a beat in A minor works with C major melodies too. The chords column lists the six chords that sound right in the key.

KEY	RELATIVE MAJOR	CHORDS THAT FIT	GO-TO PROGRESSION	DARKER OPTION
A minor	C major	Am · Dm · Em · F · C · G	Am – F – C – G	Am – Dm – Em
E minor	G major	Em · Am · Bm · C · G · D	Em – C – G – D	Em – Am – Bm
B minor	D major	Bm · Em · F♯m · G · D · A	Bm – G – D – A	Bm – Em – F♯m
F♯ minor	A major	F♯m · Bm · C♯m · D · A · E	F♯m – D – A – E	F♯m – Bm – C♯m
C♯ minor	E major	C♯m · F♯m · G♯m · A · E · B	C♯m – A – E – B	C♯m – F♯m – G♯m
G♯ minor	B major	G♯m · C♯m · D♯m · E · B · F♯	G♯m – E – B – F♯	G♯m – C♯m – D♯m
E♭ minor	G♭ major	E♭m · A♭m · B♭m · B · G♭ · D♭	E♭m – B – G♭ – D♭	E♭m – A♭m – B♭m
B♭ minor	D♭ major	B♭m · E♭m · Fm · G♭ · D♭ · A♭	B♭m – G♭ – D♭ – A♭	B♭m – E♭m – Fm
F minor	A♭ major	Fm · B♭m · Cm · D♭ · A♭ · E♭	Fm – D♭ – A♭ – E♭	Fm – B♭m – Cm
C minor	E♭ major	Cm · Fm · Gm · A♭ · E♭ · B♭	Cm – A♭ – E♭ – B♭	Cm – Fm – Gm
G minor	B♭ major	Gm · Cm · Dm · E♭ · B♭ · F	Gm – E♭ – B♭ – F	Gm – Cm – Dm
D minor	F major	Dm · Gm · Am · B♭ · F · C	Dm – B♭ – F – C	Dm – Gm – Am

Tuned off 440? Set your tuner here

Some beats and samples aren't tuned to A = 440 Hz. If the beat is off, set your vocal tuner's reference to match, and the tuning will sit right instead of fighting the beat.

BEAT IS	-50¢	-40¢	-30¢	-20¢	-10¢	0	+10¢	+20¢	+30¢	+40¢	+50¢
Set A to (Hz)	427.5	430.0	432.4	434.9	437.5	440.0	442.5	445.1	447.7	450.3	452.9

Rule of thumb: 100 cents = 1 semitone. If a beat is more than 50 cents off, it's closer to the next key over, so check both.
